BMW Longlife-04
Porsche C30

CHARACTERISTICS:

PLATINUM Max Expert V+ 5W-30 is the latest-generation synthetic, multi-grade Mid SAPS engine oil. It provides maximum power and performance of the drive system while maintaining premium engine protection. It additionally protects engines against the occurrence of Low-Speed Premature Ignition (LSPI). LSPI occurs in the combustion chamber of GDI engines prior to ignition, initiated by the spark from the spark plug. The oil provides an excellent reduction in frictional resistance in the lubrication system, resulting in best-in-class fuel economy ratings, especially when the engine is frequently started and subsequently cooled down.

This innovative technology guarantees the industry's best control of deposits, even when formed in heavy-duty operation. This oil provides the ideal engine lubrication by maintaining a durable lubricating film in all driving conditions.

APPLICATION:

PLATINUM Max Expert V+ 5W-30 is designed for year-round operation, primarily in latest-generation petrol engines with direct injection and turbocharging, as well as in modern diesel engines. This oil grade is recommended for vehicles with integrated modern after treatment systems (particulate filters: GPF / DPF, catalytic converters) to ensure their maximum efficiency and long periods of reliable operation. PLATINUM Max Expert V+ 5W-30 meets and even surpasses the latest-quality requirements of leading automakers.

It has been officially approved for use in the latest-generation engines from STELLANTIS, Volkswagen Group, Mercedes-Benz Group AG, and BMW Group, all meeting Euro 6d emission standards.

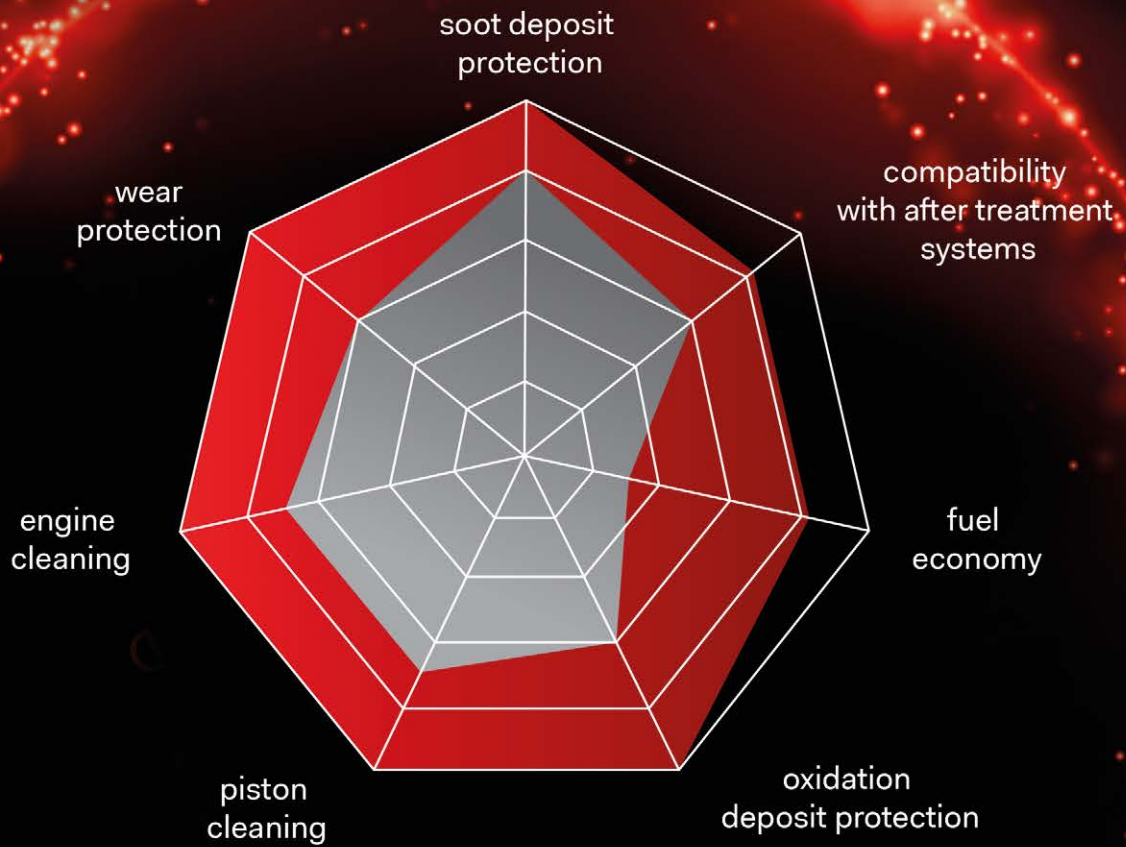

PLATINUM Max Expert V+ 5W-30 GUARANTEES:

-  superior performance and engine protection in all operating conditions
-  high fuel economy under full and partial operating loads
-  the highest thermal and oxidation stability
-  quick ignition and protection at low temperatures
-  long oil change intervals
-  reduced emissions of environmental contaminants
-  flawless operation of equipment and prime protection of after treatment systems
-  excellent piston cleaning for extended engine life
